Date completed:

Activity Name: Collaborative Care in Mental Health & Diabetes

Learning outcomes Through a facilitated panel discussion of a case study, this webinar provides the opportunity to:

- improve your understanding of the bi-directional relationship between diabetes and mental health
- identify the role of different disciplines in contributing to the screening and diagnosis, assessment and treatment of mental illness in people with diabetes
- explore tips and strategies for interdisciplinary collaboration in supporting people with diabetes and mental illness.

Time spent engaged in the activity:

(including completing this form)

After watching or listening to the activity, consider the following:

1. What were three key messages that were covered in the activity?

2. Identify your learning goal and how the activity's content aligned with that goal.

3. What actions are you going to take to use the learnings to improve and/or change your practice? For example:

- Explore the topic further in a supervision session or with a peer/colleague
- Identify and read the latest research
- Undertake additional courses, study or training
- Search MHPN's webinar or podcast libraries for more PD content
- Join an MHPN network to connect with other practitioners for networking, peer support or PD

4. Please note any other reflections on the topic or activity.
