Activity Name: Supporting the Mental Health and Wellbeing of Primary School Children and their Families

Learning outcomes Watch this facilitated panel discussion of the Harper family's story be better equipped to:

- an increased awareness of the benefits of collaboration between mental health practitioners across primary school, health and community settings
- strategies to achieve effective and timely collaboration to support primary school-aged children experiencing mental health difficulties and their families
- an increased awareness of the benefits and opportunities for involvement with initiatives such as KidsMatter when working with primary school-aged children.

Time spent engaged in the activity:

(including completing this form)

After watching or listening to the activity, consider the following:

1. What were three key messages that were covered in the activity?

2. Identify your learning goal and how the activity's content aligned with that goal.

3. What actions are you going to take to use the learnings to improve and/or change your practice? For example:

- Explore the topic further in a supervision session or with a peer/colleague
- Identify and read the latest research
- Undertake additional courses, study or training
- Search MHPN's webinar or podcast libraries for more PD content
- Join an MHPN network to connect with other practitioners for networking, peer support or PD

4. Please note any other reflections on the topic or activity.
